# WHY DO I NEED A SPACE COMMANDER™?

10 YEAR  
WARRANTY

## Additional benefits that Space Commander™ offers

- Space Commander is engineered and built to carry a 500kg load
- Heavy Duty supporting legs and beams keeps unit rigid
- Space Commander has single door hinged at the top (not sides) so the door can be opened without moving the car.
- There are no middle pillar/beams so you can store long items – surfboards, golf clubs etc, much more usable space.

### OVER BONNET

4 SIZES

The Space Commander™ product is a purpose-built, fully engineered design. It is not a box on legs, rather an integrated structure whereby every component is designed and positioned to maximize strength, rigidity, ease of installation and longevity. The legs, for example, rise from the floor to the very top of the storage unit.

Steel is the material of choice - strong, robust and reliable. You can achieve maximum strength without requiring the "bulk" that say plastic or wood requires.

Heavy Duty supporting legs and beams keeps unit ridged

Space Commander has single door hinged at the top (not sides) so doesn't swing out and hit the car in adjacent car space and the door can be opened without moving the car

There are no middle pillar/beams so you can store long items - surfboards, golf clubs etc,

Clearance under unit with extensions is max 1300mm. We find that most 4WD fit well within this height.

All units are individually keyed.

### DOUBLE DECKER

4 SIZES

The Space Commander™ double decker takes our over bonnet storage to the next (lower) level – adding up to 2.5 cubic metres of extra storage if you don't need to get the bonnet of your car underneath the storage unit.

The addition of the storage cabinet below is perfect for longer car spaces, or shorter cars, and offers the practicality of an easily accessible storage cabinet for heavier or awkward items.

Body corporate approval for your car space is never a problem, and we can happily provide you with suitable documents to assist your formal application.

Building and strata managers are big fans of our product range!

Our comprehensive range of sizes, matched with our product engineering, design and quality, has made us the market leader – to find out why visit [www.spacecommander.co.nz](http://www.spacecommander.co.nz) or call **0800 952 952** to arrange for an obligation free measure of your car space!

### **3 WAY STEEL LOCKING SYSTEM**

Security and peace of mind

### **SOLID, ALL STEEL CONSTRUCTION**

Long life, strength, durability and engineered to carry a 500kg load.

### **FIRE SAFE DESIGN AND MATERIAL**

Compliant with building and council planning codes

### **HEIGHT ADJUSTABLE FOR 4WDS**

Can be raised to fit over any large 4WD vehicle using 4WD leg extensions

### **WIDE OPENING DOORS**

Ease of opening, can accommodate large items such as bikes, surfboards, etc

### **LONG LIFE RUST PROTECTION**

Galvanised panels

### **SMOOTH, POWDER COATED FINISH**

Long life and a desirable appearance

### **NO MIDDLE PILLAR**

Store large items

### **DOOR HINGES AT TOP**

Open unit with car still underneath

### **SITS FREESTANDING ON YOUR CAR SPACE FLOOR**

Does not need to be fixed to the wall or floor – perfect for common property installations. Can be moved from site to site.

## MAJOR PROJECT INSTALLATIONS

Space Commander™ has completed many large installation projects for major New Zealand and Australia property developers and construction companies.

For a premium residential apartment complex, we supplied and installed 70 Over Bonnet storage units in the architect's specified colour of powder-coated matte black. The result was fantastic – a very striking look in the carpark and optimal storage.

## OUR CUSTOMERS ARE *thrilled!*

*They are thrilled with being able to get the bikes, golf clubs, suit cases, winter clothes, surfboards and all manner of other household items out of the apartment and into the basement where they belong.*

Our taller models can store up to 5 bikes and are rated as a Class 1 Security bike storage facility (Australian Standard AS 2890.3-1993).

## PROPERTY DEVELOPERS

Space Commander™ is the perfect storage solution for new and existing multi dwelling residences. We have extensive experience in working with Australia and New Zealand construction companies, building managers, builders, architects, specifiers, property developers, strata managers and body corps to meet residential storage requirements within planning and building code and in a cost effective manner. We have many examples of completed projects in New Zealand.

### SPACE COMMANDER™ CAN DELIVER THE FOLLOWING BENEFITS TO YOUR PROJECT:

- Increase the market appeal of new apartments by providing supplementary storage in the basement garage
- Create a consistent and neat appearance in the basement garage
- Enforce a minimum construction standard and level of quality
- Ensure that all residents/car spaces can have a storage unit regardless of any space constraints
- Additional storage as required by council regulations

#### DIMENSIONS

- A Overall external length
- B Overall external height
- C Overall external depth
- D Floor to cabinet clearance

|  | MODEL    | DESCRIPTION                  | LENGTH (A) | HEIGHT (B) | DEPTH (C) | CLEARANCE (D)  | STORAGE (M³) |
